EDUCATION

Jaypee Institute of Information Technology

Bachelor of Technology in Computer Science and Engineering | Noida, Uttar Pradesh

July 2023 – May 2027

CGPA: 8.3/10

BNJC School, Dandeli, Karnataka

Class 12th | (Maths: 100, Physics: 99, Computer Science: 99)

2021 – 2022

Percentage: 95%

SKILLS

Programming Languages: C++, Java, JavaScript, TypeScript, Python, SQL

Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS, React.js, Next.js, EJS

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL, Firebase | **Libraries:** OpenCV, MediaPipe

Tools & Platforms: Git, GitHub, Postman, Vercel, Render, Cloudinary, Google Cloud Platform (GCP)

PROJECTS

EduSmart Plus | Tech Stack: React, TypeScript, Firebase, AST, TF-IDF |

[GitHub](#) | [Live](#) | [Report](#)

- Enhanced personalized learning experiences by developing an adaptive learning platform with 15+ quizzes, 30+ question banks, blogs, and real-time progress tracking for 10+ active users.
- Improved assignment evaluation efficiency by implementing automated plagiarism detection, achieving 60% detection accuracy and generating detailed similarity reports across 10+ submissions.
- Increased user engagement by engineering gamification features such as badges, streaks, and leaderboards, while optimizing real-time synchronization to support seamless multi-user interactions.

SafarNest | Tech Stack: Node.js, Express.js, MongoDB, Bootstrap

[GitHub](#) | [Live Link](#)

- Improved property discovery and booking efficiency by developing a vacation rental platform that enables users to browse, book, and manage properties, supporting 20+ listings across multiple locations.
- Enhanced user experience and platform security by implementing interactive maps, advanced search filters, authentication, and authorization, reducing property search time by 30% and ensuring secure access control.

AirClick | Tech Stack: Python, OpenCV, MediaPipe, PyAutoGUI

[GitHub](#) | [Demo](#)

- Enabled touchless human-computer interaction by developing a gesture-controlled suite featuring a virtual mouse, hand-sign language typing, and a gesture-enabled game using real-time computer vision.
- Improved interaction responsiveness by implementing MediaPipe-based 21-landmark hand tracking, recognizing 4 gesture patterns for cursor control, navigation, and application-specific actions.

Smart Metro | Algorithms and Data Structures: C++, Graph Algorithms, Object-Oriented Design

[GitHub](#)

- Optimized metro route planning by developing a navigation system for 50+ stations using Dijkstra's Algorithm, while implementing Trie and Huffman Coding to improve route lookup efficiency and reduce memory usage.

PlacementDex | AI-Powered Placement Email Automation | Node.js, Gemini LLM, Notion API

[GitHub](#) | [LinkedIn Post](#)

- Automated placement data management by developing an AI-powered email processing with filtering and structured data extraction, handling 100+ emails/day with 80% parsing accuracy and reducing manual data entry by 70%.

ACHIEVEMENTS

- LeetCode: **1900+ (Knight, Top 4.32%)**; secured **Rank 639/35,968 (Top 1.8%)** in Weekly Contest 497.
- Achieved **Global Rank 228** in [CodeChef](#) Starters 229 and secured **Top 5% (982/21k)** in [Codeforces](#) Round 1049.
- Solved **1000+ DSA problems** across platforms; earned **5-star** in C++ and Problem Solving on [HackerRank](#).
- Secured **All India Rank 4600** in COMEDK UGET 2023, placing among the **top 6%** of 80,000+ candidates.

LEADERSHIP AND VOLUNTEERING

- Tech & Management Volunteer – OPTICA IIIT Society:** Helped organize technical workshops and student events, coordinated with speakers and team members, and supported event management activities.

CERTIFICATIONS

- Google Cloud Skills Boost Arcade — Gold League:** Earned 20+ cloud skill badges (21,860+ points) and completed labs in Cloud Run, Pub/Sub, App Engine, and Speech APIs. Verified on [Credly](#) and [Cloud Skills Boost](#).
